

# A digital engineering leader with a full-service portfolio

## How can you harness the power of technology to succeed in growing your business?

Our clients need to become digital-first companies that compete through superior software platforms. Nagarro helps them transform, adapt, and build new ways into the future through an entrepreneurial, agile, and caring mindset.

We excel at digital product engineering and deliver on our promise of thinking breakthroughs.

Today, we are 19,500 experts across 35 countries, forming a Nation of Nagarrians, ready to help our clients succeed.

Thinking Breakthroughs

**AI, data, cloud, and automation are the keys for future-ready solutions. We bring advanced expertise in these areas when engaging with clients.**

Our services include:

### Product studio and innovation

From launching elegant and intuitive consumer-grade apps, to rapid prototyping, and creating full-fledged products, we've got you covered.

- Delightful user experience and design
- Customer journey transformation
- Rapid prototyping and product studio for launching new digital ventures
- IIoT and wearable technologies for connected workforce

### AI-led intelligent solutions

From deploying machines with vision, to robots that read, to turning billions of rows of data into insights, we create impactful AI based solutions to drive business innovation.

- Deep learning-based AI solutions
- Big data services
- Business insights and intelligence across business processes

### Digital engineering and design

Creating delightful products and digital solutions is largest part of our business.

- Business transformation and innovation consulting
- Personalization and experience led solutions across CRM, marketing, eCommerce and cloud-based platforms
- Enterprise modernization and IoT
- Custom web application, mobile apps engineering

### Enterprise and managed services

We bring 30 years of expertise in helping you manage and scale your most important infrastructure.

- Strong capabilities in enterprise applications (ERP, IAM, etc.)
- Service management, application monitoring and help desks
- Application management and support DevOps and CloudOps

## Success stories

### Flight Planning for over a hundred airlines

Nagarro builds the flight planning software for Lufthansa Systems, which is used by 110 airline customers to calculate over 30,000 flights daily. It optimizes take-off and landing performance, the flight route, and the flight level profile - considering all flight restrictions, CO2 emission targets, weather and historical aircraft data. When your pilot says "Your estimated flight time is 4 hours and 57 minutes," they are likely relying on Nagarro-built software.

### Cruising through digital times

The BMW Group is one of the world's largest and most innovative automotive manufacturers. The company is on the leading edge in terms of vehicle technology, design and consumer experience, environmental protection, and -mobility. Nagarro has been a partner to the BMW Group since 2016 and supported them in building and managing several digital products and platforms for new-age mobility.

### Improving productivity in tower inspection and repair

Nagarro developed an AR-based solution to simplify the tower inspection process and maintenance for A1 Telekom Austria Group. The solution has enhanced the efficiency of the technicians, reducing the acceptance process time from 3 hours to 40 mins per task, discovering more deficiencies, and finding resolutions at runtime.

### R&D partner for ASSA Abloy

We are a key partner for software development and a partner for R&D efforts of ASSA Abloy – the world's largest locking systems company. Nagarro set up an Innovation Centre in Gurgaon, India, for ASSA ABLOY Shared Technologies, and staffed it with engineers with the right knowledge, experience and technology accelerators. Special care was taken to align the team with the ASSA ABLOY culture.
