64labs Implementation Approach

Five phases | Separate SOWs | Pick 1 or all 5

1. <u>Sprint 0</u> [fixed $165k] ➜ 4 weeks: connect APIs, design system completed in Figma, UI built in Storybook, CMS architected, all components scoped

2. <u>Scopotype</u> [fixed $400k] ➜ 8 weeks: driven by 64labs, ~70% complete, executable stories for BuildToLaunch phase

3. <u>Build to Launch</u> [time & materials ~$180-$340k] ➜ The remaining ~30%, client team, partner SI, and 64labs; knowledge transfer

4. <u>Launch</u> [fixed $60k] - Assist client team through launch and bug mitigation

5. <u>Momentum</u> [time and materials ~$60k-$100k a month post-launch] - Series of six-month contracts to support customer and complete agreed roadmap of upgrades and additions while training internal team or partner
