About Cloud-Digital

Cloud-Digital offers end-to-end Salesforce, AWS, and DevOps solutions including designing, development, testing, deployment, and monitoring & support. Cloud-Digital, based in Atlanta, Georgia, works with a variety of industries such as healthcare, manufacturing, financial services and retail. The Cloud-Digital team is made up of elite technical professionals with a passion for building innovative custom applications while leveraging the most cutting edge technology available.

Cloud-Digital was founded by Trevor Travers, a graduate from Kennesaw State University in the Computer Science field and a certified Salesforce Consultant and Developer with experience of more than 10 years, and David Triplet, an outstanding Salesforce Developer and a Certified Salesforce Consultant with over 10 years of experience.

Cloud-Digital Services

Salesforce - We specialize in implementing and customizing Salesforce to help your business achieve its goals of digital transformation. Our CRM consultants help customize the right Salesforce Cloud solution based on your unique needs.

AWS - Whether you want to deploy complex AWS environments or manage data migration to AWS, we will make your cloud investments agile and future-ready.

DevOps - We aim to break unproductive habits, increase efficiency, and improve outcomes across the board with DevOps consulting and implementation services.
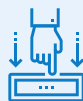

What Make Us Diffirent

Financial Services Industry Experience

Cloud-Digital possesses financial services industry experience with handling large amounts of capital, both in terms of scale and scope, understanding of compliance requirements, including adherence to internal standards, externally required practices and guidance for products and execution capabilities. We possess the ability to work in a highly regulated environment, and a strong background working with financial service providers, including banking/asset management organizations and insurance companies.

The Data Visualization Experts

Cloud-Digital is skilled in creating interactive elements that tell the story behind your data. We use spreadsheets and software to analyze information, and visualize it with charts, graphs, interactive elements, high-quality video, and even 3D graphics - any element that allows you to pull a wealth of information from a single glance.

Commit to User Retention and Grow

Our mission is to create the most customer-friendly software. We do this by making our products and services intuitive and easy to use and understand, so you can spend more time working and less time figuring things out. This helps teams stick with our solutions.

- 🛒 **TRAVEL**

> " Being an automotive business, it was hard for me to maintain good communication with my existing and potential customers. Thanks to Digital Salesforce, now everything is sorted and smooth.

John Davis

Our Experiences

UX/UI DESIGN EXPERIENCE

As a team of experts with deep knowledge of user experience (UX) and user interface (UI) design techniques, we're committed of sharing our expertise, helping our clients achieve their goals. We focus on the important interaction between the user and an experience, with an emphasis on design solutions that are simple, intuitive, and helpful.

AUTOMATION DESIGN EXPERIENCE

Cloud-Digital automation design gives enterprises the tools to design and deliver unique products faster with our easy-to-use cloud-based software. We will build apps/programs that automatically complete repetitive work for you, streamline data exchange with partners, helping you get to market faster.

AI EXPERIENCE

With our deep insights into artificial intelligence and cognitive technology, we envision and develop the next generation of AI solutions and consulting to accomplish diverse industrial needs and grow businesses to the next level. Our managed AI services encompass fraud detection, automatic patching and backup. We work across teams to build feature-rich enterprise-grade AI applications.

Call or email Cloud-Digital when you're ready to take your business from conventional to exceptional. It's time to embrace innovation.
