TRIPLE III INNOVATIONS

Software development company

User-driven solutions to tailor your future

salesforce

Microsoft Azure

tmforum MEMBER

Triple Innovations excels in delivering user-driven, configurable solutions, tailored to specific business cases across multiple industries.

This approach allows clients to efficiently adapt solutions to their unique needs, reducing reliance on extensive development resources and enhancing operational efficiency.

Our knowhow was built on projects in Telecom industry, Pharma, Mobility, Gaming and Energy, where we delivered turn-key projects and provided professional services.

Salesforce Implementation

We make sure Salesforce is connected with the rest of your business, including applications and business processes.

| Service	Sales	Marketing	CPQ	Commerce	Platform	Integration	Industries	Field Service

Our team of Salesforce experts, including developers, consultants, and architects, excels in a wide range of Salesforce cloud solutions, delivering services tailored to your specific business needs without unnecessary complexity or cost.
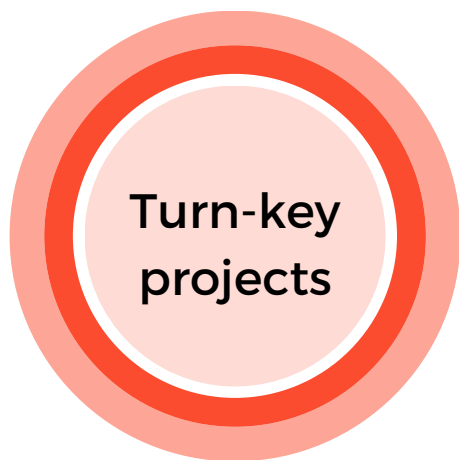

Tailored Software Development

Our software development team offers full spectrum of tailored services, from enterprise solutions to SaaS, Cloud infrastructure (Azure), DevOps, UX/UI design, sophisticated integrations for optimal efficiency and best user experience.

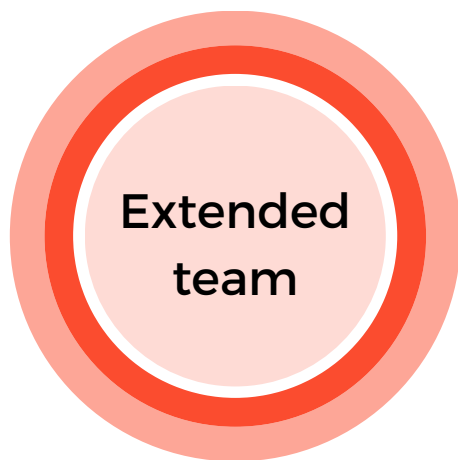

We cover the full lifecycle of product management, from precise specification and design to implementation and dedicated support.

As business people we value strong partnership, partner time and budget.

As software developers, we value best engineering practices ensuring the delivery of high-quality solutions.

Turn-key projects

Extended team

Dedicated team

Delivery and support of complete product or solution

Additional members to your existing team

Team responsible for solution or part of your solution

ofca

Telco-specialized CPQ

CPQ (Configure, Price, Quote) solution for creating quick and accurate quotes brings compelling sales experience and improves sales force efficiency. Ofca no-code Configure, Price, Quote solution is used by sales reps and product management without need for an IT expert help for product configuration.

TIGAR
Data Protection Solution

Enterprise company Data Protection and Data Governance solution ready as a SaaS solution for any business industry. System is simple to integrate with any customer facing solution (like CRM, web, Web shop, SMS) and set up by DPO (Data Protection Officer) through administration console.

COMMANDO
Coupon Management System

Implementation of Coupon Management System solution used for keeping all coupon data and marketing processes related to coupon codes in one place.

PURE WIN
Promotion and Product Catalogue Solution

Promotion and product catalogue solutions that will reduce your time to market from weeks to hours and enable your marketing team to execute quickly with no need for IT services.

Convergence CRM implementation

A1

Communication Service Provider CRM implementation and support including product catalogue, order management, agent facing front end. System handles 80% of BSS business logic for Telco Convergence offering.

Tendering solution

teva

End to end tendering process that unifies tendering, sales and logistics in one tool (Salesforce CRM). Done as generic solution for big Pharma, configurable for different industries and markets requiring complex tendering process.

Custom CPQ - Price calculator

A1

Price calculator software used for defining complex products and offering these to customers. Software is used by all sales agents, product teams and management as a central solution for product defining, customer offering and reporting in real time.

Call center implementation

teva

Responsible for global implementation of call center software for Teva within multiple countries and regions (France, Netherlands, UK ...).
