

PURPOSEFUL DIGITAL TRANSFORMATION

Cannabis Case Management & Licensing

Effectively govern your state cannabis industry.

ROBUST AND SCALABLE PLATFORM FOR THE GROWING CANNABIS INDUSTRY

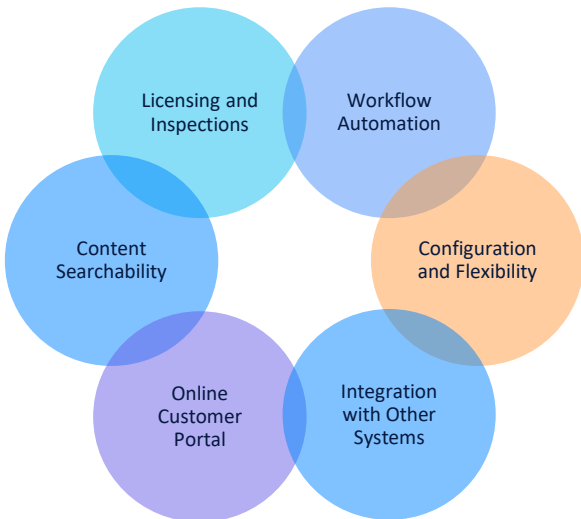

States that have legalized marijuana for medical or recreational use are presented with significant opportunities when it comes to licensing and regulating the cannabis industry. Creating a fair and transparent licensing process is a primary opportunity for government agencies. State licensing programs demand ongoing adaptation and innovative solutions to keep pace with the complex landscape of cannabis operations.

AST has developed a secure, flexible solution, using Salesforce's innovative technology, to accept and process license applications, issue licenses, and allow constituents to manage their licenses.

With AST Cannabis Case Management and Licensing, you can connect your citizens and public servants, serve constituents at scale, and accelerate the application pipeline from request through resolution. Our solution is specifically designed to enhance the security, accuracy, data visibility, and transparency of the cannabis supply chain while ensuring regulatory compliance, tax revenue accountability, and consumer protection, all while holding cannabis licensees to the highest ethical standards.

ADDRESSING CRITICAL BUSINESS NEEDS

Salesforce's integrated Customer 360 Platform delivers out-of-the-box cloud services that allow you to quickly get started and configure solutions specific to your vision and requirements.

- Secure, Private, Reliable
- Single Source of Truth
- Empowered Constituents
- Transparency and Collaboration Across Internal Teams
- Information Available Anytime, Anywhere

ENHANCING PUBLIC HEALTH AND SAFETY

AST's solution enhances the mission of state government with a 360° view of licensed organizations, credentialed citizens, their related applications, complaints, fees, inspections, and compliance with related regulatory code.
