

Langan ESG

Offering a Comprehensive
Solution for ESG Challenges

January 24, 2024

Technical Excellence Practical Experience Client Responsiveness

LANGAN

What is ESG management's biggest challenge?

The biggest challenge of ESG management is communicating a wide variety of needs to an even wider variety of stakeholders, each of whom speaks a different “language”.

Langan features business professionals who speak those languages ranging from engineering to business management to information technology who can not only cover all of a company's ESG needs but do so:

Delivering a realistic, executable solution for the strategy, design & implementation stages

Providing efficiency in communications, data management and scheduling

While coordinating multiple services & transitioning between stages

Consistently in compliance with regulations & client instructions/messaging while leveraging available incentives

Langan Meets the Challenge

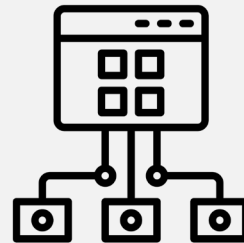

Langan's consolidated response means our clients...

- save time and money on ESG administration,
- progress faster to ESG implementation and mitigation project execution and
- execute fit-to-purpose ESG projects

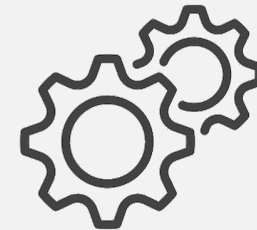

Langan is the only consulting company who bundles the full suite of ESG services allowing for seamless:

Strategy to Design to
Execution Transition

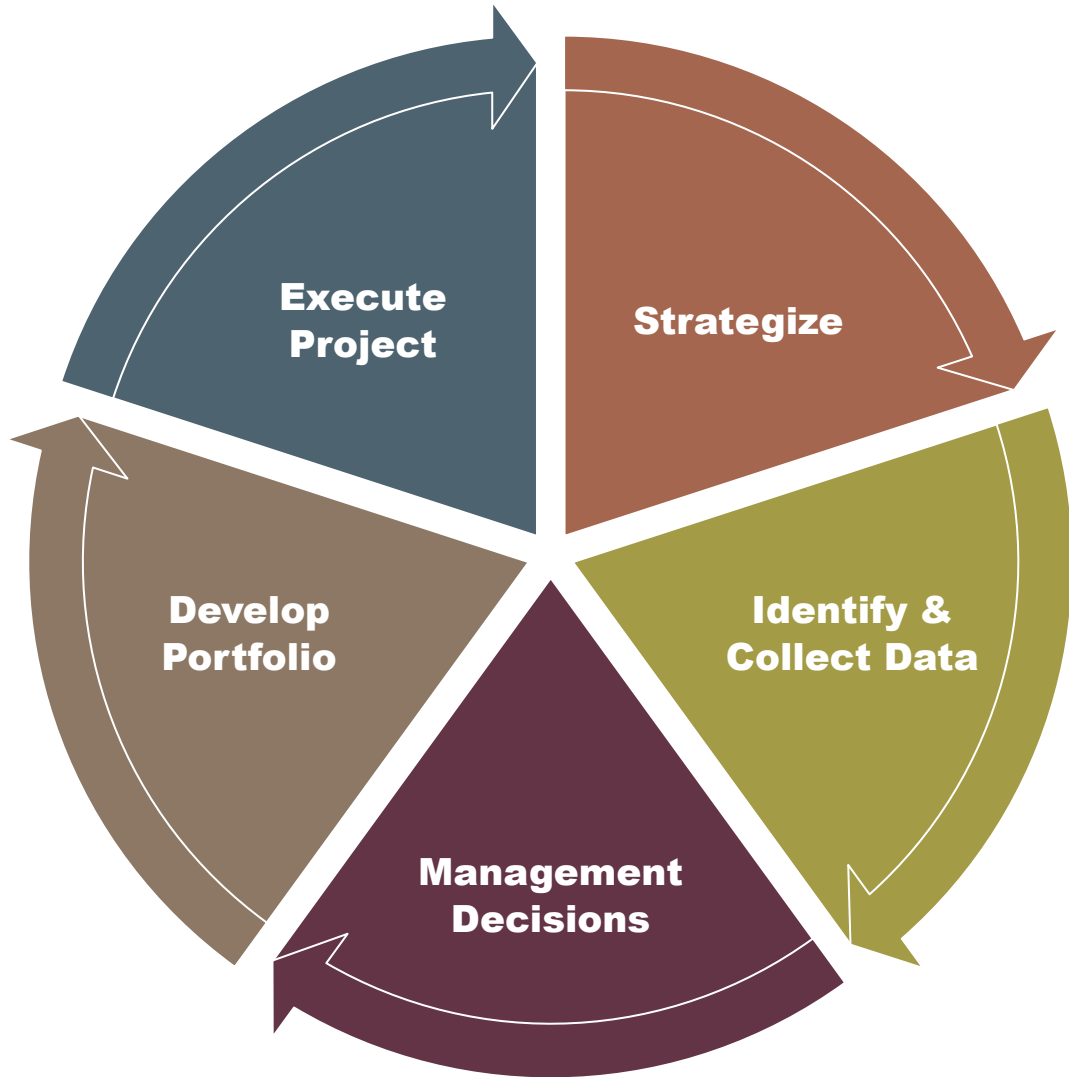

Technology, Tool &
Metric Harmonization
Across the Lifecycle

Full-Service Engineering
to Support Execution

The 5 Key Elements of ESG Performance Management

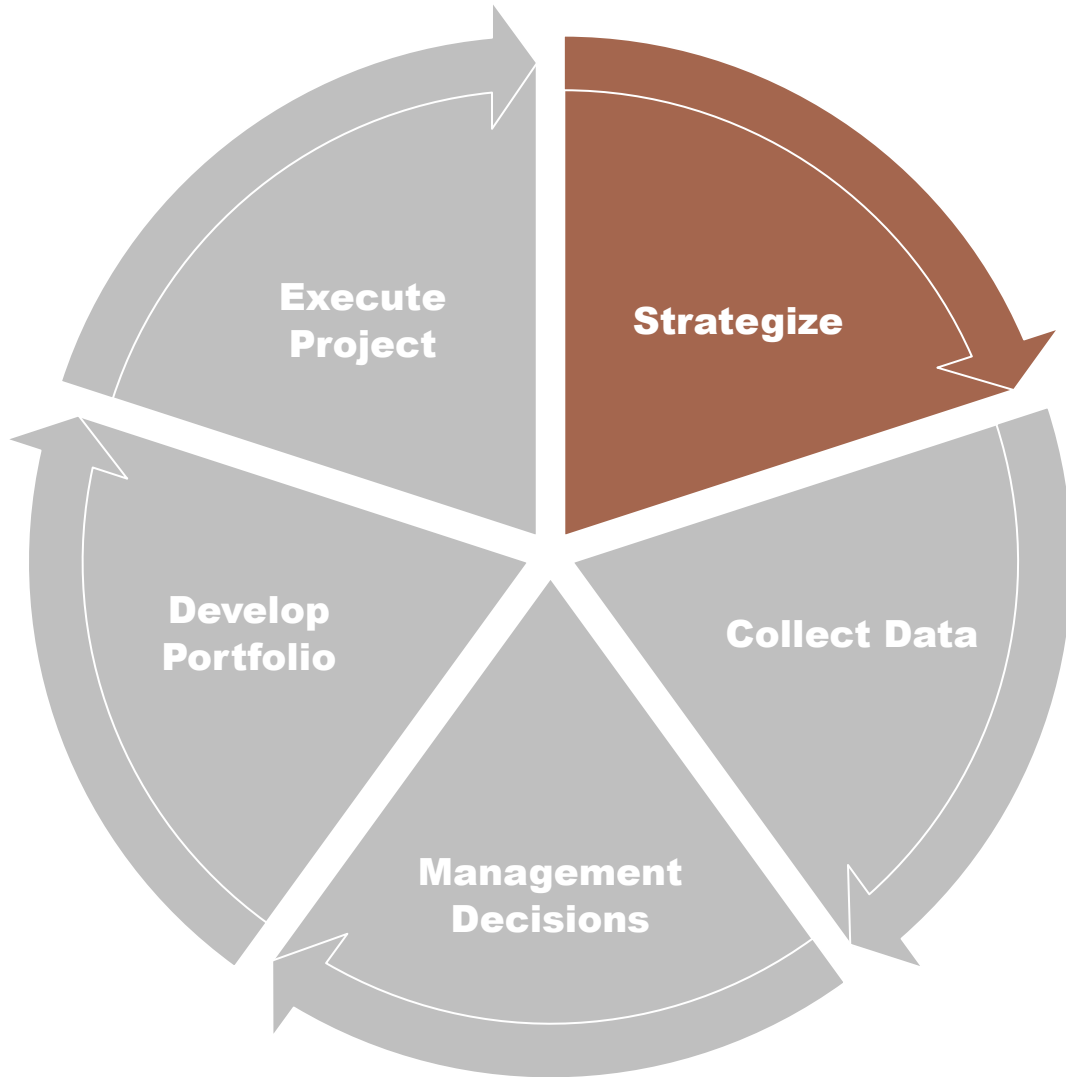

Only Langan offers:

- ESG professionals,
- Information management professionals,
- Carbon management professionals,
- Business Management consultants,
- Engineers and
- Due diligence professionals

In one company
providing seamless coordination
to support all 5 elements

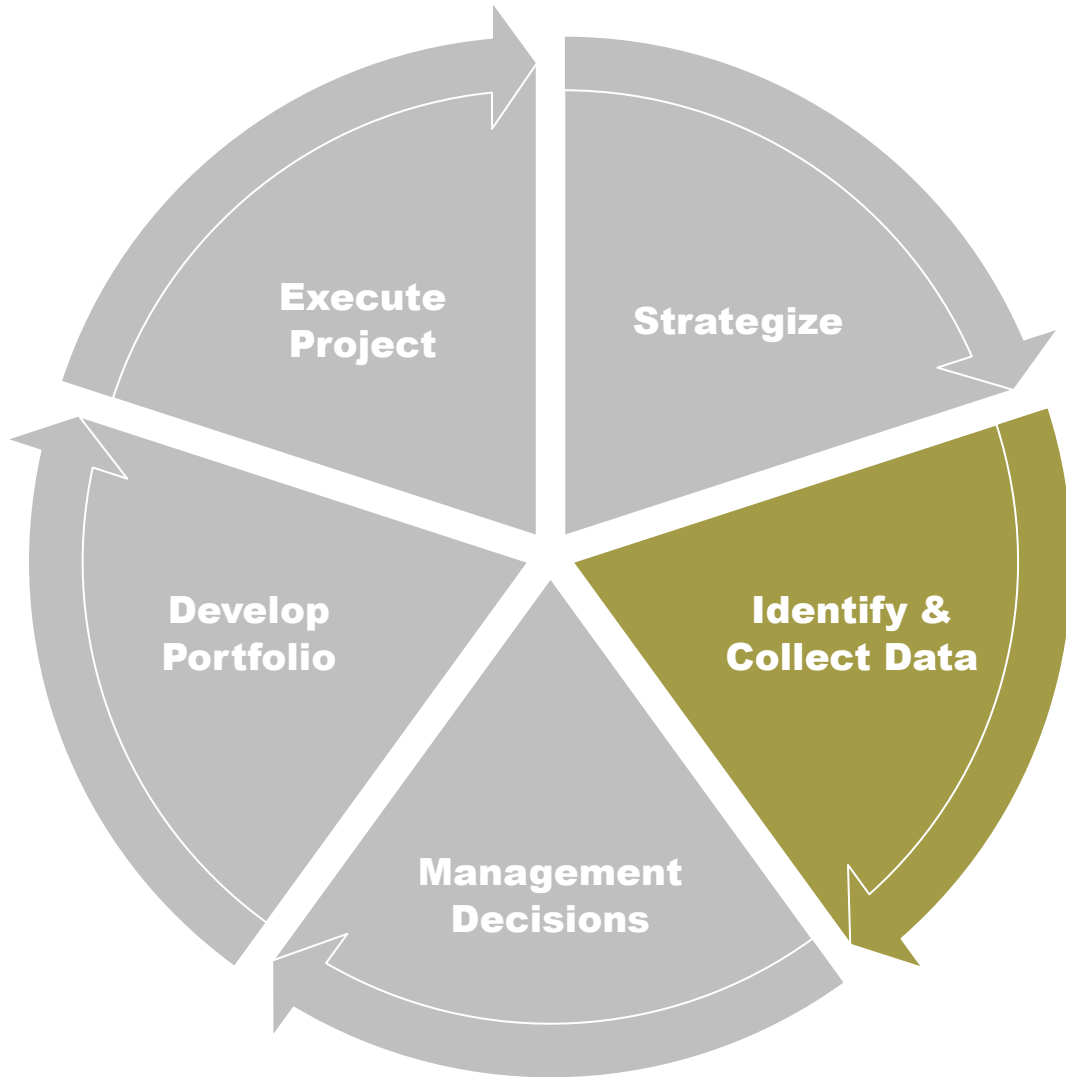

What Langan Offers

Establish a Comprehensive ESG Strategy & Roadmap Incl. Materiality, Boundaries, Inventories, Disclosure and Budgets

ESG professionals with a variety of backgrounds and up to 15 years experience in ESG strategy development and implementation, including management of stakeholder demands

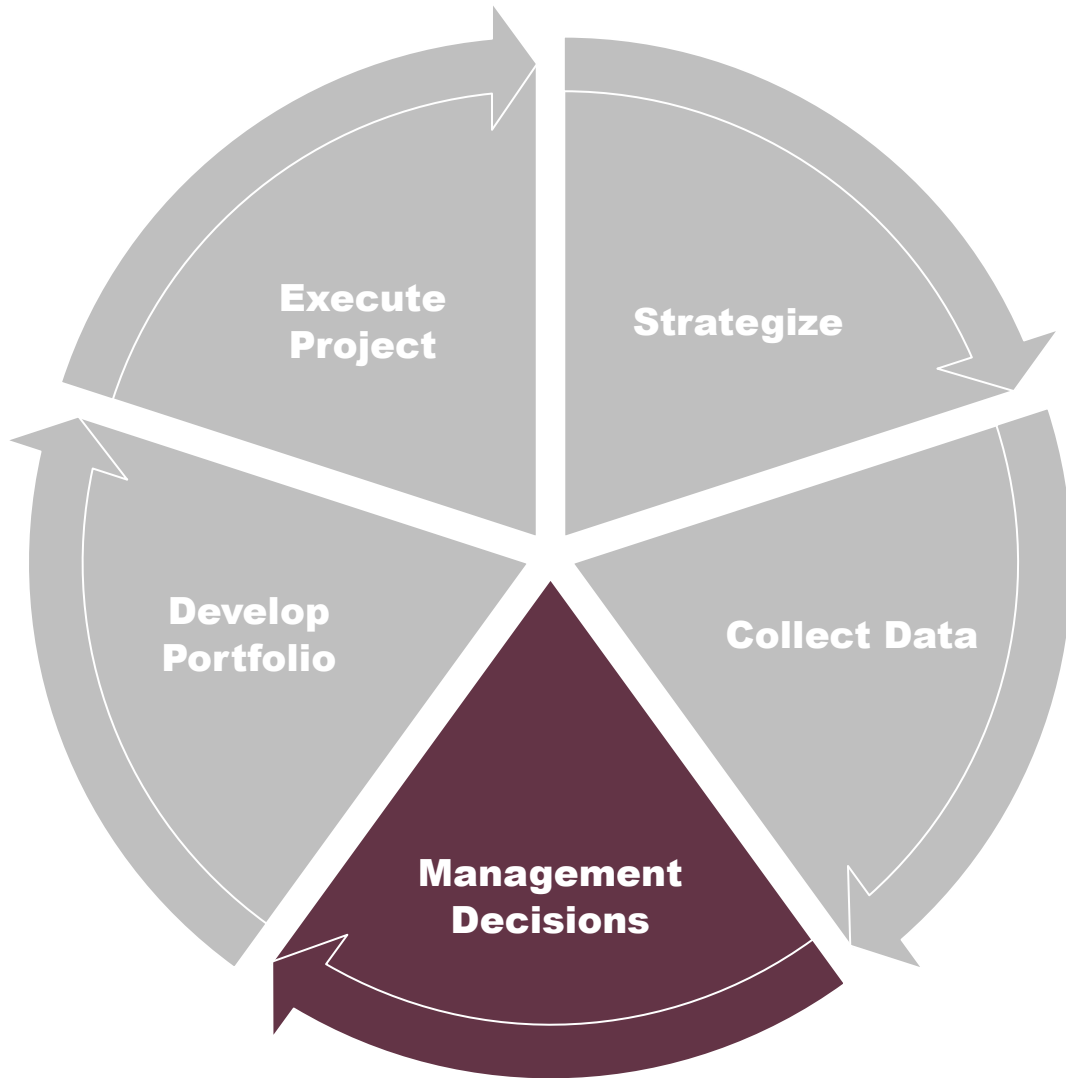

What Langan Offers

Identify, Collect and Process Necessary Data from Multiple Sources

Information management professionals specializing in data management software selection and implementation as well as integration of ESG metrics into existing data categories and silos

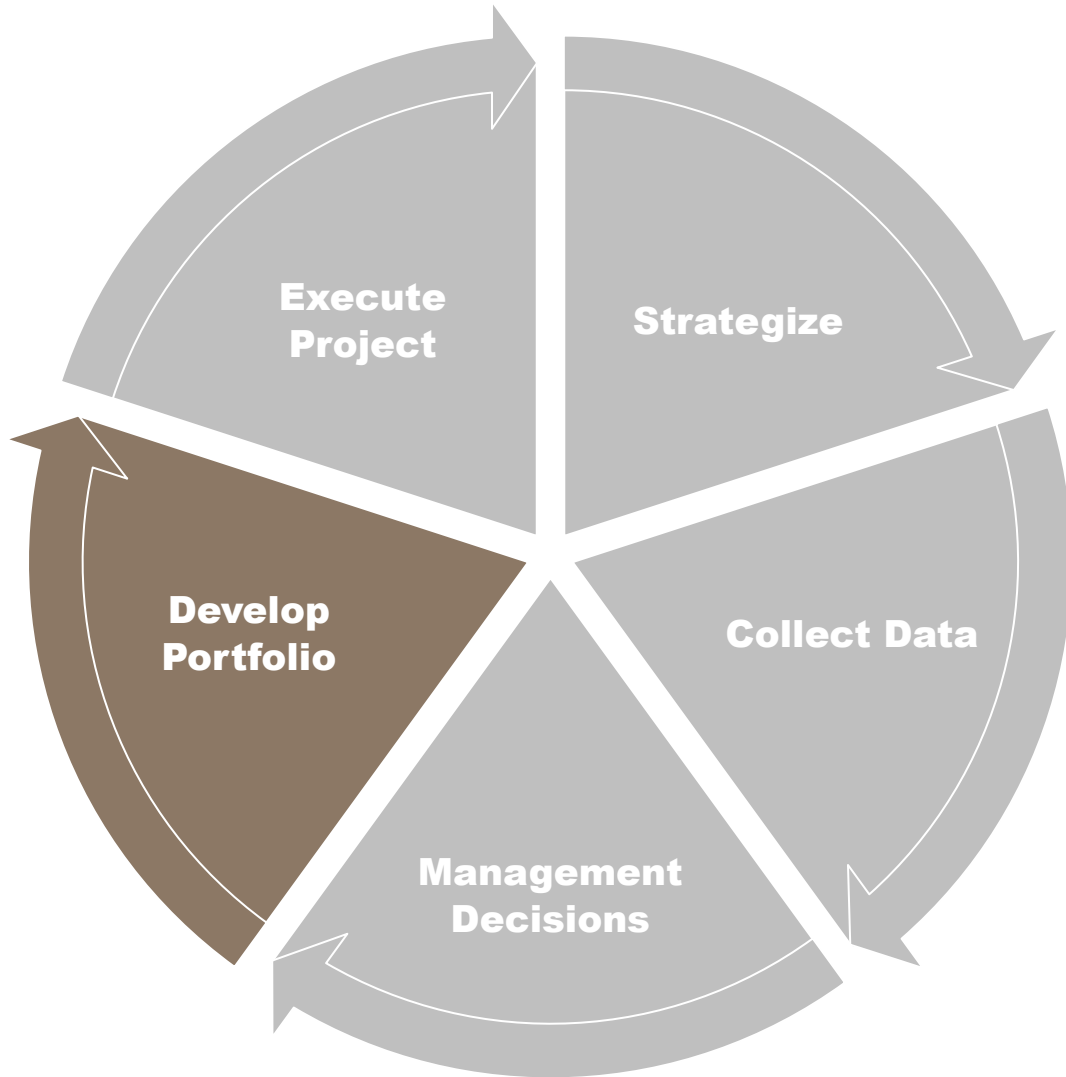

What Langan Offers

Make Net Zero Carbon and Climate Risk/Opportunity Management Decisions

Carbon management professionals and management consultants with experience in setting and executing net zero carbon goals (with and without SBTi involvement) and in identifying and managing climate change transition and physical risks and opportunities) with and without the IFRS/TCFD framework)

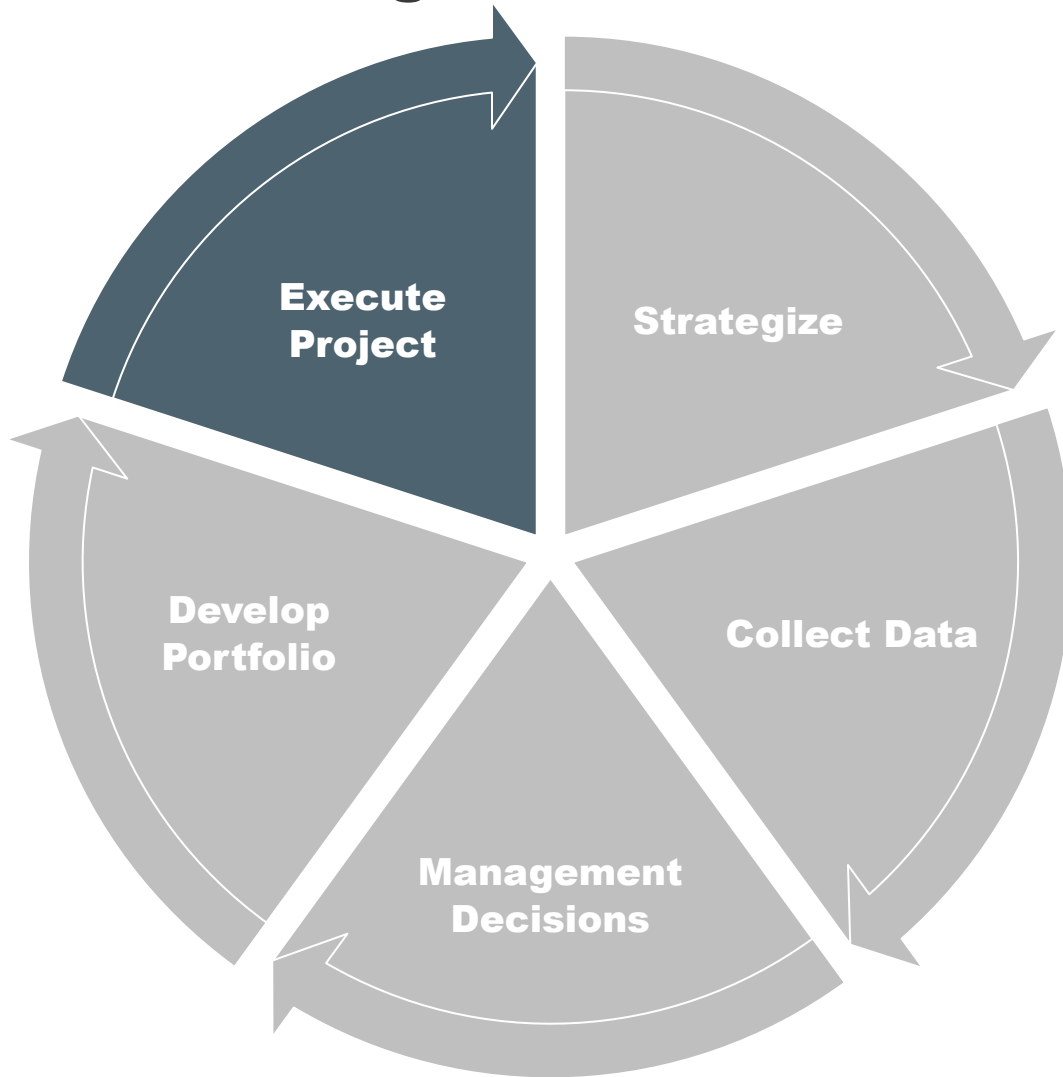

What Langan Offers

Convert Decisions into Projects: Decarbonization, Mitigation & Operations Transformation

Engineers trained in ESG applications to design, implement and build projects as well as refine operations to implement climate change commitments made in strategies and disclosures or required by regulation or stakeholder demand

What Langan Offers

Help Fund Projects via Inflation Reduction Act & Other Incentives & Carbon Trading

Management consultants, due diligence professionals and engineers to identify, apply for and provide fulfillment guides for grants/tax credits available under the Inflation Reduction Act and other governmental and non-governmental incentive programs, including generation of carbon credits under international standards.

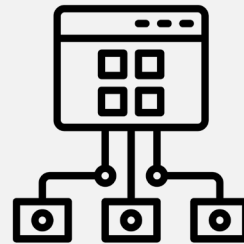

Langan's Bottom Line

Langan's clients spend less money and time on ESG administration, allowing them to invest more in fit-to-purpose ESG implementation and mitigation projects because:

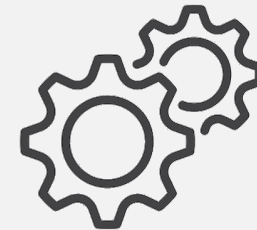

Langan is the only consulting company who bundles the full suite of ESG services allowing for seamless:

Strategy to Design to
Execution Transition

Technology, Tool &
Metric Harmonization
Across the Lifecycle

Full-Service Engineering
to Support Execution
