

# Elevate Rides leverages DigiTools Consulting and Eposly to create a seamless customer experience for their customers

## CHALLENGE

Elevate Rides had too many manual tasks as a Non-Profit for techs and employees.

They lacked real time insights into scooters rental data and the ability to make data-driven decisions.

## SOLUTION

Employees have the data they need to provide real time updates to staff & customers.

Manual tasks were automated jointly with Eposly Point-of-Sale to streamline the customer experience.
