

# Salesforce Health Check

Maximise your investment in Salesforce today

## Successful solutions are built on solid foundations, plans and goals. We ensure best practice and maximum value from your investment.

### How it works

We use our experience, certified consultants and standard approach to review your Salesforce implementation.

We undertake a thorough review of all aspects of your implementation, covering over 100 areas. We include supporting policies and procedures, taking into account Salesforce feature usage and general maintenance, before providing a clear and comprehensive assessment that is presented back for review and discussion.

### Your stepped journey

#### 1 Discovery Call

Set the context, approach and scope of the exercise before starting the review.

2

Insight Check

#### Org Setup Review

Complete the assessment following a defined approach.

Validation

3

#### Create Findings Report

Produce the report containing the results of the exercise.

Consensus

4

#### Joint Review

Take you through our results in detail and complete handover, including recommendations.

## The benefits

Validation that best practice is followed.

Identification of gaps and weakness.

A thorough remediation plan to address issues.

Reduced future costs and risk.

Improved value from your investment.

Improved experiences for your users.

Flexible Org on which to build future capability.
