

Transform Reporting Experience for Tableau Customers

Pixel Perfect can support 4 broad categories of well-formatted reporting - Regulatory and Compliance Reporting, Executive & Management Reporting, Operations Reporting and End User Reporting

Value Proposition

- Automated print-ready well-formatted reports within 5 to 10 seconds
- Faster Time-to-Insight for Self Service and Data Democratization
- Increase in Tableau User Adoption by ~85%
- 25k+ Monthly Report Exports
- 100k+ Monthly Report Recipients
- 70% Manual Effort saved
- Zero Slippage in Regulatory and Compliance Reporting

Key features

- Single click print-ready well formatted report export in PDF, PPT, Excel, CSV & MS Word
- Paginated PDF Reports with repeatable headers, footers, logos, page numbers and page breaks
- Cross Tabular Excel Reports without limitation on number of rows or columns
- Ability to retain both Tables, Listings, Headers and Charts based on user selection
- Customizable Data Packet Consolidation and Branding

Success Stories

Digital Infrastructure Company

USEReady helped the customer migrate from its legacy BI platforms to Tableau, a modern and powerful data visualization tool.

Outcomes

- Retire its legacy BI and embrace a modern BI
- Enable self-service reporting for SDMs
- Improve report performance by 80%
- Increase user satisfaction and adoption
- Lower costs and better resource utilization

Large Financial Services Organization

USEReady deployed Pixel Perfect, a reporting extension for Tableau, to create wealth summary and holding reports for the end users.

Outcomes

- Customized, well-formatted reports for 40,000+ users
- Enhanced end user reporting experience
- Automated report generation and 99.99% on-time distribution
- 60% Reduction in manual effort and 0% errors in report creation
- Added value leveraging its existing Tableau investment
