Understand Franchise Model; Responsive; Great Work

Our company has tested other systems and CRMs. We've tried two other CRMs in the past 3 years. The team at Fast Cloud are building us a system that will be able to grow with us for the next 10 years. They understand the franchisor/franchisee relationship. They understand the pillars necessary for our model. They have been responsive and great to work with. We have nothing but praise for our experience with them.

Franfast - A Game-Changer for Vio Med Spa!

Franfast has been a game-changer for VIO Med Spa. We've been searching for a solution to streamline our operations and enhance our overall efficiency, and Franfast has exceeded our expectations. We have tried other platforms and simple excel sheets. Franfast has given our team back time with automations in the new store opening process. Nicole and Josue are fantastic! Anytime we've had a question or needed assistance, they've been responsive and helpful. Their dedication to customer satisfaction is truly commendable.

Five Stars are not enough!

I've had the privilege of collaborating with Rogelio and Josue for nearly three years, and assigning them just five stars hardly does justice to their exceptional work. Josue meticulously created my Onboarding System from the ground up, not only incorporating every intricate detail I requested but also intuitively enhanced its functionality through his design expertise. What truly sets Josue apart is his unwavering support for our team; he's consistently available to address our queries and is always eager to assist both our corporate team and franchise owners. Whenever I reach out with requests for modifications, edits, updates, or any task, I can trust Josue to respond promptly with a well-considered solution already in place. Furthermore, Josue's talent for transforming my Excel spreadsheets, screenshots, and documents into precisely the functionality I need is nothing short of indispensable. His understanding of my thought process, combined with his ability to grasp the intricacies of my day-to-day work requirements, has been invaluable to our partnership.
