

CAPABILITY STATEMENT

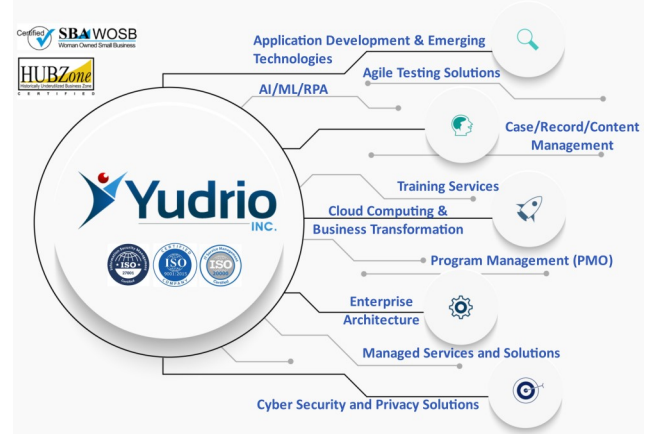

Yudrio, Inc. is an SBA HUBZone and Women-Owned certified, boutique Information Technology (IT) solutions provider. We provide the depth of expertise and capabilities of a large company while maintaining the intimacy of a small business. Yudrio supports mission-critical applications by providing innovative, customized, end-to-end services that demonstrate measurable benefits. Our results-oriented success emanates from our pioneering approach to consistently solving complex problems.

We have developed our core competencies to address the needs of the evolving government market by producing sustainable, adaptable, and economical solutions that integrate seamlessly within emerging architectures and standards.

Core Capabilities

- Enterprise Case and Document Management Solutions
- Full-scale Testing Solutions
- Cloud Computing
- Enterprise Architecture
- Application Development and Emerging Technologies

Enterprise Case and Document Management Solutions

Yudrio excels in deploying robust, flexible, and scalable Enterprise Case and Document Management solutions, utilizing a diverse range of COTS products, including Salesforce, Alfresco, OpenText, Drupal, and SharePoint. We specialize in Legal Case Management System implementations. As a preferred Federal system integration partner for many leading technologies, our deployments adhere to DoD 5015.2, FedRAMP High, and NARA compliance standards, ensuring secure, standardized case and document management solutions. Each implementation is tailored to meet specific enterprise requirements, streamlining workflows and enhancing both operational efficiency and regulatory compliance.

Full-Scale Testing Solutions

Yudrio has developed deep expertise in application, security, system integration, automation, and performance testing principles. Yudrio's industry-leading test engineers have provided manual, automation, performance, and security testing solutions at the individual application level and the enterprise level to various Federal Government agencies. Yudrio provides full-scale testing solutions to adhere to the most complex business and technical needs.

Cloud Computing and Cybersecurity

Yudrio, Inc. is a cloud integrator with extensive experience in designing, implementing, and securing robust solutions for the Federal Government and private sectors. Our deep cloud expertise includes not only seamless infrastructure transitions and extensions—both vertically and horizontally—but also advanced cybersecurity measures to protect sensitive data throughout the process. In addition to private clouds, we work with leading platforms such as Azure, AWS, Salesforce, Google, and Rackspace. Our specialized knowledge in cloud and cybersecurity will guide you through the complexities of cloud computing, delivering immediate cost savings and fortified security through economies of scale.

Enterprise Architecture

Yudrio's enterprise architecture (EA) approach plays a key role in improving our clients' organizations by leveraging years of experience in integrating people, processes, and technologies. Our systematic approach to optimizing resources and assets has delivered innovative and technologically secure EA solutions to meet the most stringent requirements. Yudrio EA offers valuable cost savings, improved visibility into the IT landscape, risk reduction and compliance, and better business-IT alignment that enables rational and targeted IT planning and investments.

Application Development and Emerging Technologies

Yudrio was founded on its application development expertise. Today, this expertise remains a cornerstone of the business. Yudrio has a wealth of knowledge in developing agile solutions using emerging web technologies. From enterprise-wide custom solutions to mobile applications, our capabilities allow enterprises to achieve their goals with ease.
