

CloudQnect's

DevSecOps Assessment Service

In 3 - 5 weeks* learn how to make your Salesforce DevSecOps scalable.

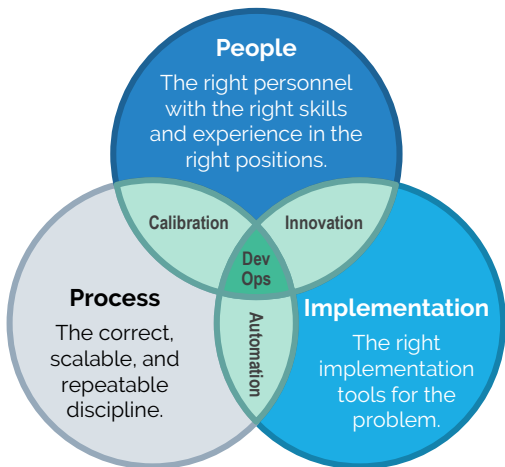

*For a standard DevSecOps Assessment

- Are your releases taking days or weeks vs. minutes or hours?
- Do your releases require multiple developers vs. just the release manager?
- Do your releases have multiple defects/bugs?
- Is your security scanning a manual process?

If you have answered yes to any of the above, you will benefit from a DevSecOps Assessment.

Successful Salesforce DevSecOps is comprised of 3 co-dependent pieces

Average Results our Clients Achieve

95+%

Reduction in Bugs

4X

More Releases

40%

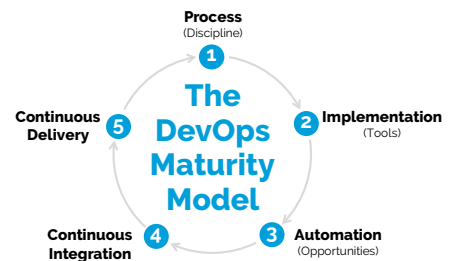

Increased Salesforce ROI

What will a DevSecOps Assessment Provide?

1. A report and DevSecOps Maturity grade for your current DevSecOps state.
2. A report and forecasted DevSecOps Maturity grade for your future DevSecOps state.
3. An implementation plan on how to get to the forecasted future state.

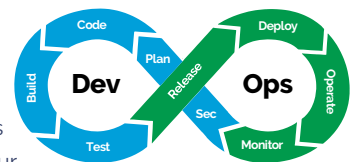

Maturity begins with discipline.

- ✓ Discipline
- ✓ Automation
- ✓ Speed

CloudQnect DevSecOps: Driving More Success with Salesforce
