

RevRamp: Specialized AI Tool for CPQ-to-RCA Transformation

Overview

The Clock is Ticking

With Salesforce announcing the end of sale for CPQ, enterprises must prepare for the shift to Revenue Cloud Advanced (RCA). The move isn't just mandatory, it's an opportunity to reimagine revenue processes with more speed, intelligence, and agility.

The Transition Challenge

But the shift to RCA is not a simple lift and shift. Years of CPQ customizations, complex pricing rules, and approval workflows don't map neatly into RCA's new architecture. Without a structured path, organizations risk data loss, broken processes, inconsistencies, and costly downtimes.

That's where Forsys steps in. With 10+ years of experience driving successful CPQ and Revenue Cloud programs, we've been at the heart of enterprise revenue transformation.

Building on this expertise, we created RevRamp: An AI-powered tool purpose-built to simplify and de-risk the RCA journey. RevRamp provides a guided framework to:

- ➔ Assess existing CPQ configurations
- ➔ Align with RCA best practices
- ➔ Migrate with speed and confidence

What could be a disruptive overhaul becomes a seamless evolution, delivering ROI in weeks, not years.

Some of the Key AI Powered Features of Revramp:

Automated Schema Extraction – Capture the entire CPQ or RCA schema in a single view including products, bundles and rules.

AI-Powered Analysis – Assess your CPQ setup with data, rules, pricing, and configurations to spot inefficiencies and technical debt.

AI-Guided Task Management - Structure tasks, define timelines, assign ownership, and track dependencies.

AI-Driven Mapping & Transformation - Convert CPQ data into RCA models using smart templates, validating every step to ensure integrity, compliance, and seamless migration.

Experience RevRamp at Dreamforce

Join us **live at Marriott Marquis** and see how RevRamp transforms RCA adoption:

- ✓ **One-click, one-minute RCA Readiness Score** – Detect transition blockers from outdated workflows to broken processes
- ✓ **One-click CPQ Assessment** – Spot inefficiencies, redundant customizations, and risks that silently pile up as tech debt.
- ✓ **AI-powered RCA Learning** – Empower teams with AI-driven, role-based training to reduce resistance & simplify adoption.

CPQ is sunseting. RCA is the future. RevRamp is your fastest, smartest bridge.
