

ReLabel**One**

Your AI-Powered Auto-Intelligent Document Classification & Renaming Accelerator!

Ensuring Accuracy and Cost Effectiveness

The Challenge

Most large enterprises have **growing volumes** of extensive financial, compliance, and client reporting documents that **must be regularly updated and managed manually**

Complicating matters, **your files are spread across multiple platforms**, making standardization difficult. (PDF, XLSX, CSV, PPTX, TIFF, JPG) .

Unfortunately, **manual file naming is slow, expensive**, and can cause:

- **Inconsistent** formats across teams.
- Risk of **higher reporting/compliance errors**

AI-Powered Document Classification

The Solution

An **AI-driven solution** to economically manage and **expedite the auto-classification and renaming/labeling** of your **disparate documents** (PDF, XLSX, CSV, PPTX, TIFF, JPG) .

Can be customized to meet your **compliance and reporting requirements**

Enterprise-grade LLM: ensures **data confidentiality within your secure environment**.

Connects to **Dropbox, SharePoint, Google Drive, or Internal storage** via APIs.

Automatically update 1000's of disparate documents

How does it work?

RelabelOne - AI solution that applies **customizable naming conventions** aligned to internal frameworks.

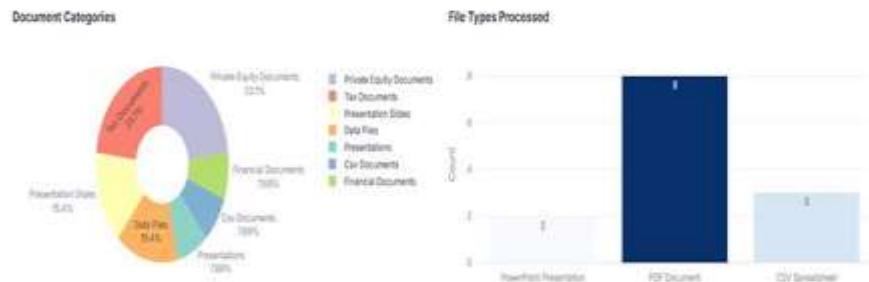

- Example: *Form 1120S* →

DTD BusinessNameForm

File Type	Created	Processed	Ratio
PowerPoint Presentation	0	0	0.00%
PDF Document	0	0	0.00%
CSV Spreadsheets	3	3	100.0%

Analytics Dashboard

- **Fully configurable rules** for different file types and departments.

- **Works wherever files reside**
 - SharePoint, Dropbox, Google Drive, and Internal Repositories.

Real-time Reporting and Dashboards are included in the solution to:

- **Expedite** your document relabeling process
- **Track** the number of files processed.
- **Measure time saved** vs manual effort.

- **Address error reduction** and compliance alignment.
- **Provide exportable logs** for

Customized Bespoke solution to your Enterprise

- **Metadata extraction & smart tagging** for faster search.
- **Audit trail & compliance** logs for regulators.
- **Version control & duplicate detection.**
- **Natural language search** across repositories.
- **Automated file routing** to correct teams/folders.
- **Role-based access control** aligned with firm security policies.
- **Integration with DMS platforms** (iManage, NetDocuments).
- **Redaction of sensitive data** before sharing externally.
- **Multi-language support** for
