

LumenData has partnered with Informatica Product Management and Engineering teams to build Industry Vertical accelerators and connectors for the MDM SaaS platform. LumenData is also providing engineers for continued development on the MDM SaaS platform for their upcoming releases. This a multi-year effort to roll out various accelerators and connectors

Background

- Informatica LLC designs and develops data integration software and services.
- The Company offers infrastructure software includes data integration, cloud computing, complex event processing, application information lifecycle management, data quality, data security,
- B2B data exchange, and other related services. Informatica has just released their multi-tenant MDM SaaS platform.

Solutions

- LumenData has provided a team of engineers that is being deployed as of the Informatica team to provide technical skills for development in a COE model.

Outcome & Benefits

- By building these accelerators and connectors, Informatica and LumenData can provide greater ROI and faster deployments to customers.
