

Where Platforms Meet Mission Execution

Low-Code. No-Code. Mission-Critical.

Federal missions don't fail because of a lack of platforms. They fail when platforms aren't implemented, integrated, or governed with mission realities in mind.

Cherokee Federal bridges that gap—engineering low-code and no-code solutions that move quickly **without compromising security, compliance, or scale.**

Engineering the Federal Low-Code Future

Low-code and no-code platforms are reshaping how government modernizes—but only when paired with the right architecture, governance, and delivery discipline.

The team behind HESFP is now Cherokee Federal—bringing Summit-level low-code expertise directly into our Tribal 8(a) federal delivery model. That integration embeds deep platform engineering capability into Cherokee Federal's mission-focused approach, enabling agencies to modernize faster while reducing acquisition and delivery risk.

Platform Engineering & Architecture

DESIGNED FOR FEDERAL ENTERPRISE ENVIRONMENTS FROM DAY ONE

- Scalable low-code platform architecture
- Multi-org, hybrid & secure cloud environments
- Role-based access, identity & data protection
- FedRAMP-aligned deployment strategies

Application Development & Modernization

RAPID DELIVERY WITHOUT SACRIFICING RIGOR

- Case management & workflow automation
- Intake, adjudication & compliance systems
- Legacy system modernization & migration
- Data-driven dashboards & reporting

Governance, DevSecOps & Compliance

SPEED WITH GUARDRAILS

- Low-code governance frameworks
- Secure DevSecOps pipelines
- Configuration & change management
- Auditability & compliance support

Automation & Integration

CONNECTING PLATFORMS TO THE MISSION ECOSYSTEM

- API-led system integrations
- RPA & intelligent automation
- Secure interoperability with legacy & COTS tools
- Enterprise data orchestration

User-Centered, Mission-Driven Design

BUILT FOR THE PEOPLE DOING THE WORK

- Human-centered design & journey mapping
- Configurable workflows for frontline users
- Rapid iteration with mission owners
- Training, enablement & sustainment

Proven Performance at Mission Scale

Cherokee Federal delivers mission-critical digital transformation programs that operate reliably across complex federal environments. The examples below demonstrate how we apply secure cloud architecture, disciplined Agile delivery, and user-centered design to modernize government operations, improve data visibility, and enable faster, more informed decision-making.

Total Force Retention System (TFRS) Modernization

U.S. MARINE CORPS | GLOBAL ENTERPRISE WORKFORCE

HESFP, a Cherokee Federal company, led the modernization of the U.S. Marine Corps Total Force Retention System (TFRS), transforming legacy retention processes into a secure Salesforce-based enterprise platform. Using Agile delivery and user-centered design, our team streamlined talent management workflows, improved data integrity, and provided Marine Corps leadership with real-time visibility into workforce readiness and reenlistment decisions across the force.

Value Delivered:

- Automated retention & HR workflows replacing paper-driven processes
- Secure Salesforce Government Cloud architecture supporting enterprise scalability
- Improved data integrity through structured migration, validation & rollback safeguards
- DevSecOps-enabled release management with secure, repeatable deployments
- Enhanced leadership visibility into talent readiness & retention trends
- Initial deployment impacting ~10,000 users with scalability to ~200,000 Marines

Army Talent Management Task Force (ATMTF) Command Assessment Platform

U.S. ARMY | ENTERPRISE TALENT MANAGEMENT

HESFP modernized operations for the Army Talent Management Task Force by replacing fragmented, manual processes with a secure Salesforce-based digital platform supporting the Command Assessment Program (CAP). The solution unified multiple data sources and stakeholders into a centralized, data-driven system that improves transparency, reduces administrative burden, and strengthens the Army's ability to identify and develop top leadership talent.

Value Delivered:

- Digitized end-to-end credentialing and assessment workflows
- Improved workforce decision-making through real-time dashboards & analytics
- Secure IL4-compliant architecture aligned to NIST, FedRAMP & RMF standards
- User-centric mobile interface built with low-code/no-code capabilities
- Reduced manual errors & improved data accuracy across assessment processes
- High system reliability with reusable architecture supporting rapid scaling

USCIS Enterprise Platform for Integrated Citizen Development (EPIC)

U.S. CITIZENSHIP AND IMMIGRATION SERVICES | ENTERPRISE WORKFORCE PLATFORM

HESFP is supporting the modernization of USCIS workforce operations through the Enterprise Platform for Integrated Citizen Development (EPIC), an enterprise Salesforce capability supporting more than 19,000 personnel across 200+ offices worldwide. The platform replaces manual, error-prone processes with secure automation, integrated identity verification, and enterprise analytics to improve operational efficiency and compliance across DHS programs.

Value Delivered:

- Enterprise Salesforce platform supporting global USCIS workforce operations
- Automated credentialing, permitting & application workflows
- Secure integrations with identity verification & background check systems
- Real-time reporting & Tableau analytics supporting executive decision-making
- Reduced processing timelines & administrative workload across programs
- High system availability with scalable architecture supporting enterprise growth

Built for the Mission. Backed by Expertise.

Cherokee Federal delivers integrated capabilities that support national security, defense, and civilian missions at home and in critical environments worldwide. From secure IT and intelligence to medical readiness and civil stabilization, we bring the speed, scale, and expertise needed to get the mission done. No excuses.

Capabilities

ADVANCED TECHNOLOGY SERVICES

Delivering secure, cloud-native, and AI enabled systems across cyber, cloud, infrastructure, data science, and application development, driving efficiency, compliance, and mission success.

CIVIL SUPPORT & STABILIZATION OPERATIONS

Delivering people-centered services across the globe in support of public emergencies, displaced populations, disaster relief, and community recovery.

HEALTH SERVICES

Delivering end-to-end clinical staffing, scientific expertise, and public health program support to advance medical readiness, health equity, and data-driven decision-making across federal health missions.

INTELLIGENCE ANALYSIS & OPERATIONAL SUPPORT

Providing intelligence analysis, operational support, training and technology solutions within classified environments supporting defense, intelligence and homeland missions.

LOGISTICS & SUSTAINMENT OPERATIONS

Executing comprehensive logistics and sustainment operations, including warehousing, global supply chain management, and facility operations and maintenance, to ensure continuous mission readiness and optimal system performance.

MANUFACTURING SERVICES

Delivering precision manufacturing, fabrication, and assembly services for mission-critical components and systems, supporting defense, aerospace, and other federal sector requirements with reliability and efficiency.

PROGRAM & ENGINEERING TECHNICAL SERVICES

Delivering strategic program and construction management, technical advisory solutions, and SETA support that streamline operations, optimize resources, and improve organizational performance.

Your Strategic Partner in Agile Procurement.

When budget constraints and compressed timelines make traditional acquisition strategies impractical, agencies can rely on Cherokee Federal. Our family of small businesses provides access to a full spectrum of proven contracting vehicles; enabling faster awards, reduced administrative burden, and mission-aligned solutions without sacrificing oversight or compliance. We support rapid, cost-effective acquisition strategies tailored to agency needs through:

- **Tribal 8(a) Direct Awards**

- GSA Schedules
- GSA OASIS+
- GSA STARS III

Tribal 8(a) Direct Award Key Benefits Flexible Award Ceilings:

- Civilian Agencies: Up to \$30 million can be awarded Justification and Approval (J&A).
- DoD Agencies: Up to \$100 million can be awarded without J&A.
- With a valid J&A, the sole source award capability is unlimited.

Protest-Proof Process:

Direct awards to Tribal 8(a) firms cannot be protested, ensuring a disruption-free procurement process.

Speed & Efficiency:

Accelerated procurement timelines mean you can secure contracts in a fraction of the time of traditional methods, enabling you to meet year-end fund obligations and critical mission requirements without delay.

Transparent Negotiations:

Engage directly with qualified firms to align cost and performance in real time, ensuring that pricing reflects true service delivery outcomes.

Teaming and Collaboration:

Leverage the power of teaming solutions under a Tribal 8(a) contract, combining expertise across fields to create tailored, innovative solutions that drive mission success.
