Security and Compliance

General Liability Insurance

General Liability Insurance protects businesses from financial loss due to claims of injury, property damage, or negligence. It covers legal costs and payouts, ensuring business continuity by mitigating risks from accidents and damages.

PII Insurance

PII Insurance protects businesses from financial loss due to data breaches involving personal information. It covers costs related to unauthorized data access, including legal fees and notification expenses.

Software Development via Our Partner

We cover additional software development needs through our trusted partner, **Empeek**.

Founded in 2015, Empeek is a full-cycle IT services company delivering custom software development — from discovery and prototyping to implementation, QA, and ongoing support — as well as web/mobile development and dedicated engineering teams.
