

# Rapid AI Acceleration Workshop

## You Have Big Ideas for AI. We Make Them Real in One Hour.

Organizations are exploring bold possibilities with AI, but without a clear strategy, even strong ideas stall. Perficient's **Rapid AI Acceleration Workshop** gives you a fast, focused path from vision to a validated use case.

In just 60 minutes, we'll define one high-impact AI agent use case aligned to your priorities in marketing, sales, service, or commerce. Together, we'll clarify the agent's role, identify the value it can deliver, and determine the data required to bring it to life.

## What to Expect

**Explore Industry Opportunities:** We'll kick off with a quick overview of trends shaping your industry so you can clearly see what's table stakes, what's emerging, and where truly innovative AI opportunities lie.

**Identify the Right Use Case:** Through structured discovery, we'll align on your top priorities, define the agent's role, and pinpoint where supporting data already lives within your tech stack.

**See What's Possible:** Get inspired by a Salesforce demo and engage directly with Agentforce and Data 360 experts to explore real-life considerations, such as architecture, orchestration, data readiness, and more.

**Walk Away With a Plan:** You'll leave with a scored use case and mural board to help you align stakeholders, define KPIs, and build momentum toward your AI-first transformation.

## Why Perficient

Perficient is a global AI-first consultancy helping enterprises build fast, smart, and at scale.

We're obsessed with outcomes and powered by pragmatism—and through speed, agility, and genuine care, we help our clients understand and activate AI to drive innovation, achieve their goals, and transform their company.
